

Sway Cheatsheet

<https://i3wm.org/docs/userguide.html>
<https://github.com/swaywm/sway/wiki>

Throughout this guide, the Sway logo will be used to refer to the configured modifier. This is the Super/⌘ (Mod4) by default, with ⌃ key (Mod1) being a popular alternative.

Basics

 + 	open new terminal
 + 	focus left
 + 	focus down
 + 	focus up
 + 	focus right
 + 	focus parent
 + 	toggle focus mode

Moving windows

 +  + 	move window left
 +  + 	move window down
 +  + 	move window up
 +  + 	move window right

Modifying windows

 + 	toggle fullscreen
 + 	split a window vertically
 + 	split a window horizontally
 + 	resize mode

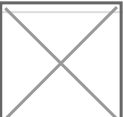

Look at the “Resizing containers / windows” section of the user guide.

Changing the container layout

 + 	default (toggle vertical/horizontal)
---	--------------------------------------

 + 	stacking
 + 	tabbed

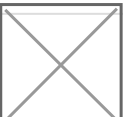

Floating

 +  + 	toggle floating
 + 	drag floating

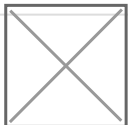

Using workspaces

 +  	switch to another workspace
 +  +  	move a window to another workspace

Opening applications / Closing windows

 + 	open application launcher (dmenu)
 +  + 	kill a window

Restart / Exit

 +  + 	reload the configuration file
 +  + 	exit Sway
